

A day in the life with smart communications technology

*“Increase **productivity, efficiency** and **collaboration** of your employees with brilliant tools and techniques.”*

A man in a dark suit is driving a car. The interior is visible, including the steering wheel, dashboard, and a smartphone mounted on the dashboard. The phone screen shows a contact card for 'James Smith' with a profile picture and a 'Call' button. The background shows a city street with buildings and trees.

"The world is mobile. One personal number activates across all of my devices ensuring I can always connect with clients and colleagues."

8am

*On the way
to the office.*

9am

*Video conference
with international
colleagues*

*"I record the call so I can refer back
at a later date and nothing is missed."*

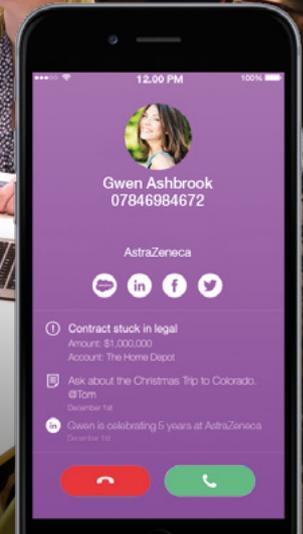

"Through contextual information that is gathered from our CRM, social media and other integrated sources I receive an overview with information about the person that is calling me."

10am

*In a meeting.
Should I answer
this call?*

"All apps and systems are fully integrated. Calls from my customers are automatically logged into our CRM system.

I can make notes directly, ensuring no activity is lost."

10:20am

My notes are updated via the Fuze app.

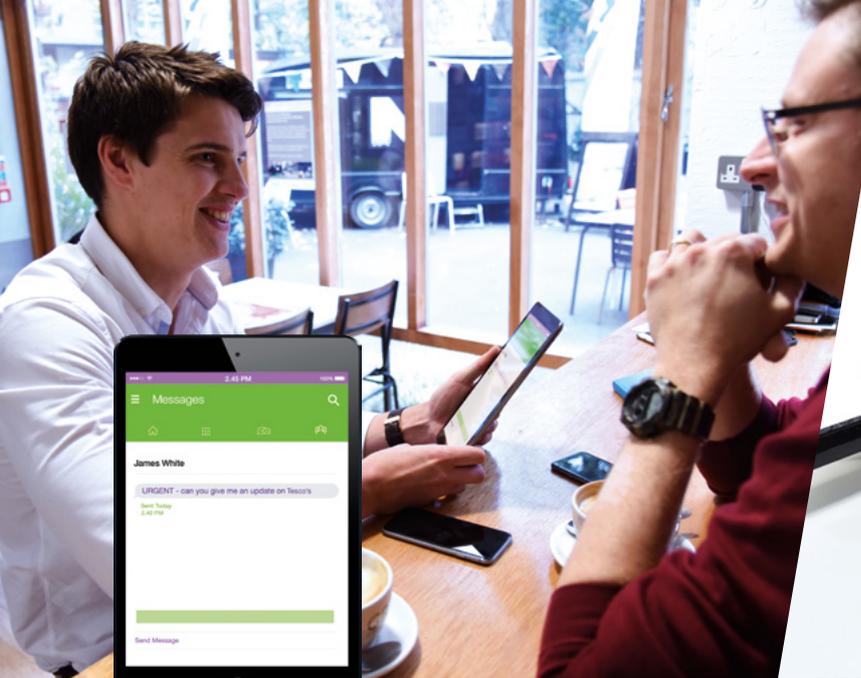

"I can make an on the spot transfer of my smartphone call to our video conference room."

12pm

*Video conference
with colleagues.*

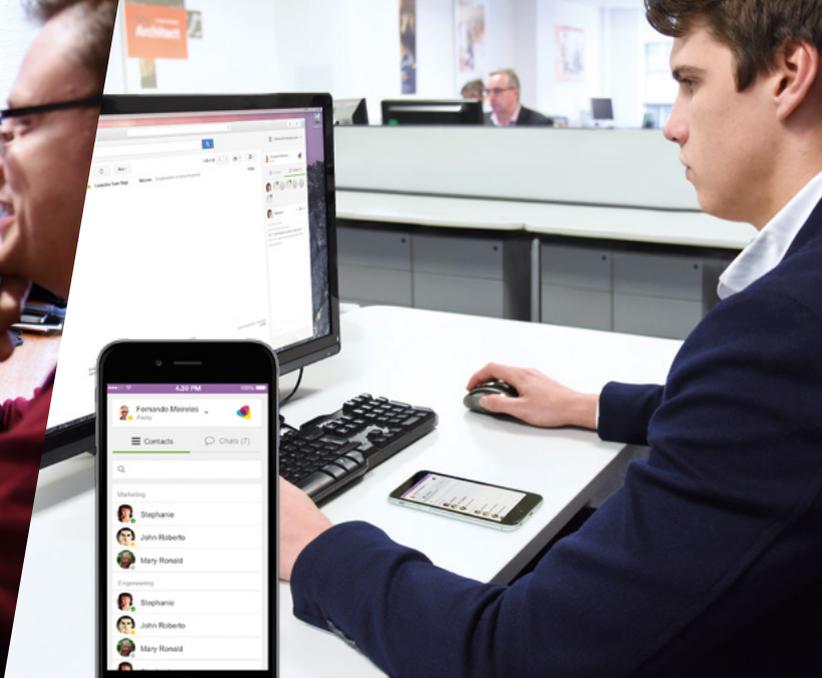

"I can see the availability of my colleagues and immediately reach them via chat if I need to liaise with them quickly."

2:45pm

Interview with a new client.

"My communications platform is available anytime, anywhere from any device via browser or app."

4:30pm

*Working off-site for a client.
Quick login via the browser.*

6pm
Management meeting

“Real-time information and reporting enables management to analyse team performance, highlight training gaps and drive productivity.”

"I have instant access to all items logged in our CRM system earlier in the day through my mobile devices. I can plan my actions for tomorrow."

8pm

*Review of my day
and forward planning.*

"We have a workforce in 50 countries and we needed to provide video conferencing to them. There are many challenges to getting hardware into countries and getting all the managed solutions configured, we needed smart hands on the ground. Fuze really just eliminated all those challenges for us by being a software tool that we can deploy immediately and users can use immediately."

— Tim Sheff, Head of Multimedia, Groupon

GROUPON[®]

Why Fuze?

Fully mobile

The Fuze app keeps your team connected wherever they are.

Ease of use

One cloud platform which is fast and simple to adopt and use

Experience it all in HD

Increase productivity by enabling high quality interactions and collaborations without interruption.

Reduce costs

Consolidate communications, reduce travel time and save costs.

We've got you covered

Enterprise IT platform with full and reliable analytics functions.
